

The Heptagon™ Collection

The Heptagon pendant shown in platinum with gold skeleton watch movement on matching platinum cable chain.

The Heptagon is a seven sided shape. A shrine to the number Seven. Seven has great cultural, scientific and religious significance; its history is enormous. Its allure includes the seven colors of the rainbow, seven seas, seven continents, seven scales of music and seven days of the week. The greatest religions in the world all acknowledge the mystical significance of Seven, including Christianity, Judaism, Islam, Hinduism and Buddhism. It is more than a number. Its unique and special qualities can be listed ad infinitum, its importance reflected across world cultures and history.

The Heptagon. Our tribute to Seven.

BRIKK™

BRIKK™

The Heptagon™ and Philanthropy

Brikk's 'profit for philanthropy' model funnels proceeds to assist populations around the world suffering from hunger and starvation. For each product sold, a specific amount of rice is allocated and distributed to those in need through select NGOs to areas such as Somalia and the Horn of Africa. Brikk's dream is simple: that other luxury brands will follow their example and adopt a permanent 'profit for philanthropy' model. The Heptagon collection features a metric ton of rice (1000kg or 2,200 pounds) distributed to the hungry for each piece purchased.

The Heptagon ring shown with optional Black Carbon Diamond coating. Standard in platinum, Side Stones in Gold, and Standard in platinum (from left to right).

About Brikk

Brikk designs and manufactures couture products and accessories for the technology, lifestyle, and fashion industries. A percentage of the proceeds from each purchase of a Brikk product is given to aid humanitarian efforts in the form of rice. The vision of CEO Cyrus Blacksmith, a former designer of computer systems and hi-tech media installations, Brikk's team consists of elite experts in Industrial Design, Engineering, Physics, Marketing and Distribution. Brikk is headquartered in Los Angeles where all products are currently manufactured, with offices in Germany and future plans to manufacture in Europe.
